

## Clinical Consultations

With Professor Mike Mulcahy

A review of best practice in conducting clinical consultations for the general dental practitioner.

### Objectives:

- Explore current professional standards for clinical examination and record keeping
- Discuss the value of special tests as diagnostic aids including radiography
- Establish processes for arriving at an evidence based diagnosis and treatment plan with each patient
- Identify the communication skills required to support the clinical consultation, including rapport building with your patients

### Suitable for:

Dentists

### Cost:

£195

This Training Event forms part of the Denplan Stairway Programme.
