

FPP Success Stories

Elgin Park Dental Practice

At Elgin Park Dental Practice I have always liked the flexibility of being able to offer some form of payment plan to our patients, but often found them confusing with regards to compliance with financial regulations.

Simplyhealth Professionals have yet again thought of a great way to simplify your life!

With the Flexible Payment Platform there are no regulatory hoops to jump through yet you can offer a payment plan to your patients with 0% interest for the really small administration fee. In the past with other payment plans the huge chunk taken by the finance company meant that we had to add a premium to all our treatments, now all the money comes to us meaning we can offer better value to all of our patients.

With the Flexible Payment Platform the administration is easy, the online portal allows you to set it all up paperless through the innovative software.

I have been very pleased with the service from Simplyhealth Professionals and so are the patients using this plan.

In short the flexible payment plan enables me to: **increase patient acceptance and offer a finance option without the historically high bills** charged by the other finance companies. I can't recommend it highly enough!
